Residential Roof Warranty Notification to Owner

Date: _____ / _____ / _____

Reference: Application Number: _____

Property Address: _____

Your contractor has applied for a permit to install a solar heating or photovoltaic system anchored to the roof structure of your home. As a condition of issuing such a permit, the City requires that you acknowledge that you are fully aware of the following

- ◆ If your roof covering is under warranty – the warranty on the roof covering may be voided by the roofing firm that holds the warranty and/or the roof covering manufacturer if you permit anyone to penetrate the roof covering (as proposed by your contractor) without the consent of the warranty holder. You should read your roof covering warranty very carefully and/or contact the roofer that holds the warranty prior to initiating this work to make sure that you are not jeopardizing any remaining warranty on the roof covering. The roof warrantor may wish to coordinate the penetration work with the solar or photovoltaic contractor to preserve your warranty.

Please acknowledge that you have received and read this document by signing and dating this form below. Your contractor will need to submit this notification with the permit application.
